Today, 4.2 billion people live in cities and that number is growing by 1.5 million each week. 90% of this urban growth will occur in developing countries in Asia, Africa, the Middle East, and Latin America.

This rapid urbanisation and infrastructure growth is fuelling an annual infrastructure financing gap of US$3.2 trillion per year globally. Thus, there is a need to engage a diverse range of actors to attract substantial private capital to public infrastructure projects.

By convening and preparing a pipeline of SDG-compliant and investor ready infrastructure projects, the Cities Investment Facility (CIF) strives to unlock significant capital flows to inclusive, sustainable urbanisation projects. Through its three pillars – Cities Investment Portal, Cities Investment Advisory Platform and Cities Investment Vehicles – CIF helps prepare upstream infrastructure projects at the (pre)feasibility stage to become “investable” and connect them with investors.

This facility complements existing investment facilities by looking at enhancing early-stage design and origination particularly in secondary cities in frontier and emerging markets. It is further unique in its focus on the broad range of the SDGs, urban masterplan-integrated projects, and its global scope with a project pipeline spanning across three main regions and ten sub-sectors.

**Value Proposition**
Support to local governments to develop financeable and sustainable infrastructure projects and enable flow of capital into urban projects.

**Facility Objectives**
- Manage a pipeline of sustainable urban development projects
- Align projects to UN Sustainable Development Goals (SDGs)
- Provide advisory services for project preparation
- Promote blended financing
- Facilitate project-investor matchmaking

**Criteria for Projects**
- Undergone preliminary scoping & preparation supported by a business case and demand study
- Part of city’s broader development strategy
- Matches UN-Habitat geographical footprint
- Regional and/or national government commitment
- Demonstrated linkages to SDG Goals & Indicators

CURRENT CIF PIPELINE

Indicative Project Sectors

- Urban Adaptation and Climate Resilience: 31.8%
- Urban Basic Services: 22.7%
- Urban Planning, Finance, Economy: 18.2%
- Land, Housing and Shelter: 27.3%

Indicative Regional Distribution

- Asia and the Pacific: 45.5%
- Latin America and the Caribbean: 9.1%
- Arab States: 18.2%
- Africa: 27.3%

CIF STRUCTURE

A series of three instruments work to engage city authorities, investors and other stakeholders in CIF: The Cities Investment Portal (CIP), Cities Investment Advisory Platform (CIAP) and Cities Investment Vehicles (CI Vehicles).

Cities Investment Portal

The CIP enables cities to better promote their urban development projects to an audience of investors and third-party experts who can provide financing, technical and advisory support through an online portal.

Cities Investment Advisory Platform

The CIAP then focuses on the upstream stages of project development, providing cities with in-depth project preparation, bankability advisory and technical assistance.

Cities Investment Vehicles

Finally, the CI Vehicles works to improve the ability of cities to access financing and reach implementation stage of their urban development projects.
